Re: **Town of Duck, Southern Shores, Kitty Hawk, and Kill Devil Hills, North Carolina, Borrow Area Investigation and Sediment Compatibility Analysis: Addendum B – Borrow Area Infilling Assessment**

Dear Mr. Stewart:

Please find enclosed two (2) hardcopies of an addendum to the *Borrow Area Investigation and Sediment Compatibility Analysis Report: Town of Duck, Southern Shores, Kitty Hawk, and Kill Devil Hills, North Carolina*, prepared by Coastal Protection Engineering of North Carolina, Inc. (CPE). The original report was prepared for the four (4) northern Dare County Towns and submitted on April 26, 2021. A subsequent addendum (Addendum A) was prepared and submitted on May 25, associated with a large sediment and shell assessment.

Following the submittal of the Town's CAMA permit application, a request for additional information was made by North Carolina Division of Coastal Management (NC DCM) regarding the amount and type of sediments that may have infilled Borrow Area A since the 2017 nourishment project. The enclosed addendum, which was submitted to the NC DCM on July 12, 2021, provides a description of the methodology, maps of locations, results, discussions, and conclusions regarding supplemental data collection and analysis aimed at verifying the compatibility of sediments within Borrow Area A. In addition, the addendum includes several appendices associated with vibracores and grab samples collected during this work.

Please feel free to reach out to me with any questions or comments regarding these deliverables.

Sincerely,  
COASTAL PROTECTION ENGINEERING OF NORTH CAROLINA, INC.
